Diamond Dog

INDEPENDENT BY DESIGN

Delegate work, not your identity.

a delegation-first
operating environment

A useful companion. Quite particular about the brief.

Diamond Dog starts with a simple arrangement: give software a specific job, with a clear scope and a record you can inspect.

01 / CHARACTER

On your side.

A working helper. Attentive, resourceful and a little independently minded.

02 / EXPRESSION

One quiet wink.

Bold type, a sharp color accent and dry language. Personality without theatre in the controls.

03 / STANDARD

Say what is known.

A good record is willing to say unknown. Its confidence must follow the evidence.

WHO / WHAT / WHY

For the hesitant automator.

“This tool could save me time. I just don’t want to give it the keys to everything.”

First audience

Technically capable individuals and small teams already using scripts, automation or tool-connected AI. Developers building for the environment are alongside them.

The proposition

A delegation-first operating environment. Each job has a scope: what it may read, what it may change and what needs sign-off.

The honest status

The design is written down. A first experiment is under way. Nothing has shipped. The intended Linux layer combines a headless runtime and an inspector.

SAME RULES FOR APPS, SCRIPTS AND AI PARTICIPANTS. NO SPECIAL STATUS FOR AI.

DESIGN SCENARIO / NOT A SHIPPED WORKFLOW

Three contracts. One message. Your sign-off.

01

Select

Three contracts. A specific job.

Give the activity only the material needed for this task.

02

Summarize

An unfamiliar tool. A bounded activity.

Define what the activity may read and change.

03

Review

The exact message. Your decision.

The design requires your sign-off before the email goes out.

04

Inspect

A record. Including unknowns.

Describe what was observed and what remains unconfirmed.

The mail service accepted the message at 14:02. Delivery to the inbox was not observed.

A SINGLE RECORD MAY CONTAIN OBSERVED ACCEPTANCE AND UNKNOWN DELIVERY.

Meet the Diamond Dog.

A front-facing companion. An open diamond at its nose. A strong, economical silhouette that carries the name in one color.

The diamond is structural negative space, not a gem badge. Keep the face calm and the geometry clear.

PRIMARY MARK / ONE COLOR

A COMPACT SYSTEM

Give the dog room.

X = WIDTH OF NOSE DIAMOND

KEEP AT LEAST X CLEAR ON EVERY SIDE

Add one nose-diamond width of clear space around the visible mark and wordmark. Canvas padding does not supply all of this space.

DIGITAL / ACTUAL CANVAS SIZES

16PX 24PX 32PX 48PX 64PX 96PX

Use the micro mark at 16-31 px. Use the full mark from 32 px. Prefer at least 48 px for an avatar.

Print starting points: mark canvas 8 mm; horizontal signature 40 mm wide. Proof at actual size before manufacture.

THE RIGHT FILE FOR THE SPACE

One name. A few useful forms.

Diamond Dog

STACKED / COMPACT SPACES

Diamond Dog

WORDMARK / NAME-LED CONTEXTS

Preferred: horizontal, at least 240 px wide. Standalone wordmark: at least 140 px. Use the outlined artwork; do not retype the logo.

INK ON PAPER / PAPER ON INK / ACID ON INK. USE TRUE BLACK OR WHITE FOR ONE-INK PRODUCTION.

A QUIET BASE. A SHARP INTERRUPTION.

Paper, ink, and a little voltage.

Paper	Ink	Acid	Lilac	Ember
#F4F0E8	#17191B	#DFFF00	#B8A4FF	#FF6B45
244 / 240 / 232	23 / 25 / 27	223 / 255 / 0	184 / 164 / 255	255 / 107 / 69

Paper and ink do most of the work. Acid marks a focal point; lilac brings warmth and a little art-school strangeness. Ember is an occasional editorial accent.

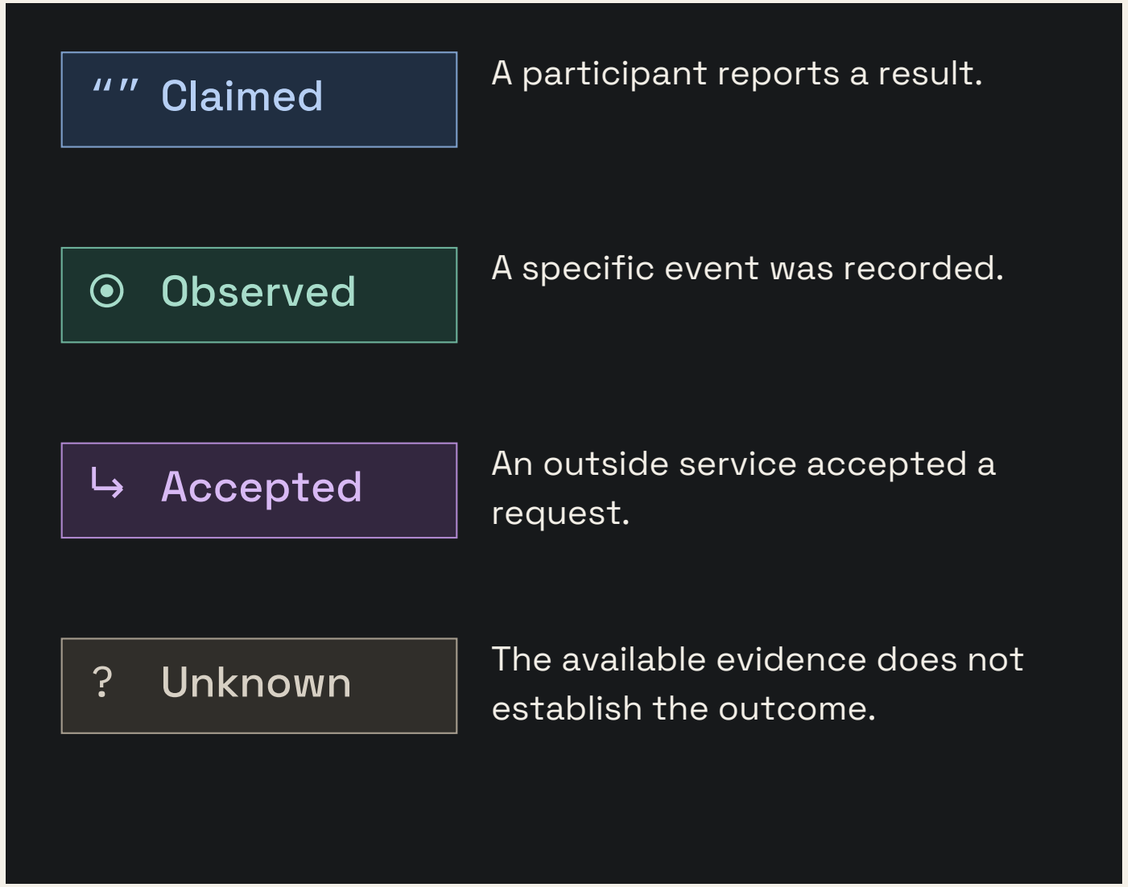

Starting mix for an editorial page: 65% paper, 25% ink, 7% acid, 3% lilac. It is a rhythm, not a quota.

NEVER USE ACID OR LILAC AS BODY TEXT ON PAPER. USE INK TEXT ON ACCENT FILLS. RGB MASTERS; PROOF PRINT COLORS.

FUTURE INSPECTOR STYLING / AFTER THE EVALUATION

The label carries the meaning.

“” Claimed	A participant reports a result.
⦿ Observed	A specific event was recorded.
↳ Accepted	An outside service accepted a request.
? Unknown	The available evidence does not establish the outcome.

These are evidence distinctions, not a progress ladder. Accepted and unknown can coexist: the request was accepted; delivery is unknown.

EXACT MEASURED TOKEN PAIRS AND CONTRAST RESULTS ARE INCLUDED IN TOKENS/. FIXED EVALUATION SCREENS REMAIN UNCHANGED.

OPENLY LICENSED / INCLUDED WITH THE KIT

Clear type. Odd little details.

SPACE GROTESK / 700

Headlines, navigation, body copy. The slightly mechanical details connect expressive branding with practical software.

MAKE THE LIMITS LEGIBLE

Structure with room to breathe.

01 / A CLEAR BOUNDARY

ACTIVITY 014

Read three selected documents.
Prepare one message.
Ask for sign-off before sending.

◆

02 / A MEASURED INTERRUPTION

Give the work some space.

Use an 8 px spacing rhythm, strong left edges, generous margins and thin rules. A single diamond can punctuate a layout.

Receipt-like columns make details scannable. Keep diamonds out of outcome status icons: they belong to the brand.

AVOID DECORATIVE CAGES, SHIELDS, PADLOCKS, MILITARY BADGES, GLOW AND FACETED CRYPTOCURRENCY ILLUSTRATIONS.

Brings the receipt.

Black ink.
Broad muzzle.
Folded ears.
A steady side-eye.

A narrow collar with one diamond tag. The humor comes from character and an extravagantly long record.

EDITORIAL CHARACTER / NOT A STATUS ICON

ORIGINAL CHARACTER / REPEATABLE FEATURES

Keep his shape. Let him have opinions.

01

Character

A sturdy, short-coated dog with a broad blunt muzzle and relaxed folded ears. Black silhouette with textured ink edges. Small expressive eyes; no theatrical eyebrows.

02

Costume + props

A narrow acid collar and a single lilac diamond tag. No bow tie. A receipt, a document or one practical object can support the story.

03

Composition

Full-body poses with open space around them. Warm paper ground. Restrained print texture. Leave the silhouette readable before adding any detail.

The mascot carries the wink. The logo carries recognition. Keep the character out of payment approvals, unknown-outcome notices and other consequential decisions.

PRIMARY ILLUSTRATION: RECEIPT-DOG-PERSONAL.PNG. EARLIER STUDIES ARE EXPLORATORY; THE PRIVATE REFERENCE PHOTOGRAPH IS NOT DISTRIBUTED.

HONEST / PLAIN-SPOKEN / WRY / CALM

Say what happened. Leave room for unknown.

Make it concrete.

What may it read? What may it change? What needs sign-off? Name the resource and action before the architecture.

Stay with the evidence.

Keep claimed, observed, accepted and unknown distinct. A receipt records evidence; it does not guarantee every external effect.

Put the wink in the right place.

Website, README, stickers and docs asides can play. Action review, money, personal records and unknown outcomes stay exact.

Respect the reader.

Aim dry humor at overbroad access and awkward conventions. Never at the user or other open-source projects.

> “We don’t know yet. Here’s what we saw.”

USE: ACCESS / GRANT / AUTHORITY / WHAT IT MAY DO. STATE THE ACTUAL OUTCOME. ONE WINK AT A TIME.

01 / PRIMARY LINE

Delegate work, not your identity.

02 / DESCRIPTOR

a delegation-first operating environment

03 / EXPLAIN IT

We’re developing an open-source layer on Linux for giving software a specific job: what it may read, what it may change, what needs your sign-off, and a record of what happened.

04 / OCCASIONAL WINK

A little less blind faith.

Good work. Clear boundaries.

THE SECONDARY SIGNATURE AND CAMPAIGN LINES NEVER DISPLACE THE PRIMARY LINE. DO NOT STACK EVERY LINE IN ONE EXECUTION.

Diamond Dog

DESIGN EXPERIMENT CONTRIBUTE

OPEN SOURCE / FIRST EXPERIMENT UNDER WAY

Delegate work, not your identity.

A delegation-first operating environment for giving software a specific job: what it may read, what it may change, and what needs your sign-off.

Read the design

Follow the experiment

The design is written down. Nothing has shipped yet.

LINUX / SAME RULES FOR APPS, SCRIPTS AND AI

GPLV3 RUNTIME / MIT SDK

STATIC VISUAL CONCEPT. BUTTON DESTINATIONS AND PRODUCTION IMPLEMENTATION FOLLOW THE PROJECT LINKS AND ACTUAL RELEASE STATUS.

USEFUL IMMEDIATELY

An identity that travels well.

Diamond Dog

Delegate work, not your identity.

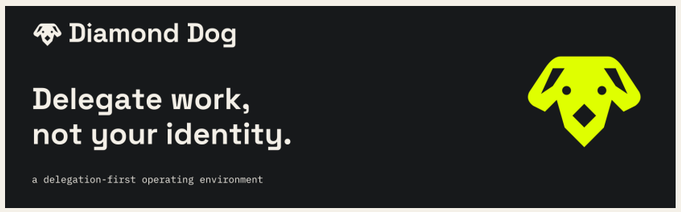

a delegation-first operating environment

First experiment under way.

Keep the name and primary line legible at feed size. Use the supplied avatar and micro favicon in compact contexts.

SOCIAL PREVIEW / 1280 X 640

REPOSITORY HEADER IS PREPARED FOR THE FUTURE RENAME. THE EXISTING ORCAOS REPOSITORY IS UNCHANGED.

A little less blind faith.

A little more to go on.

Diamond Dog

Dry wit belongs around the work. Use the campaign line on a poster, social card or docs aside; let the product explanation follow.

Diamond Dog

A little less blind faith.

OPEN SOURCE / OWN YOUR AUTHORITY

Good work. Clear boundaries.

a delegation-first operating environment

GOOD WORK.
CLEAR BOUNDARIES.

CAMPAIGN ARTWORK AND STICKER MASTERS SUPPLIED AS EDITABLE SVG + PNG. MANUFACTURE REQUIRES A VENDOR PROOF.

CALM IS A DESIGN FEATURE

The system should never make you guess.

Contrast

Body text meets a minimum 4.5:1 target. Meaningful control edges and focus indicators target 3:1. Exact state-pair measurements are in the token report.

More than color

Write the state name and pair it with a distinct symbol. Unknown stays neutral. Never turn the four evidence labels into a completion meter.

Comfortable motion

Use 140 ms for small feedback, 220 ms for transitions. Favor opacity and small position changes. Respect reduced-motion preferences; never loop a mascot during review.

The current inspector screens are fixed by the evaluation protocol. These tokens guide later design work; they do not change the experiment.

WCAG 2.2 AA IS THE IMPLEMENTATION TARGET. A BRAND PALETTE ALONE DOES NOT ESTABLISH CONFORMANCE FOR A COMPLETE INTERFACE.

PUBLIC BY DEFAULT. PRECISE ABOUT WHAT IS PUBLIC.

Give contributors something clear to use.

One master brand

Diamond Dog in prose, two words, singular. Use plain functional nouns: activity, authority, receipt, inspector. Keep the repository and existing docs as OrcaOS until the name-check gate clears.

Separate the licenses

The founder brief specifies GPLv3 for the runtime and MIT for the SDK, interfaces and examples. Included fonts use the SIL Open Font License. Brand assets need a separate usage and trademark policy.

Launch with evidence

Show one bounded design scenario and what the experiment is testing. Link the design, source and contribution route. Describe current status plainly. Do not invent install commands, domain availability or shipped integrations.

Bring a useful idea. Leave a clear trail.

NAME, DOMAIN, HANDLE AND TRADEMARK CHECKS REMAIN OPEN. THIS KIT DOES NOT PUBLISH, RENAME A REPOSITORY OR SET A BRAND LICENSE.

READY TO INSPECT, ADAPT AND USE

The practical handoff.

`logos/`	Outlined SVG and transparent PNG: mark, micro, wordmark, horizontal and stacked; ink, black, paper, white and acid.
`applications/`	1280 x 640 social card; README header; avatar; favicon SVG/PNG/ICO; poster; sticker; plain-text terminal signature.
`illustration/`	Personal-reference mascot, prompt and usage rules. Explorations kept separately. Private source photo excluded.
`fonts/ + tokens/`	Openly licensed type files and licenses; CSS/JSON tokens; light/dark state colors; measured contrast report.
`copy/`	Primary messaging, prelaunch announcement, README draft, one-page voice guide, strategy and production notes.

SVGS ARE RGB MASTERS. USE THE TRUE-BLACK ARTWORK FOR ONE-INK WORK; OBTAIN A CMYK OR SPOT-COLOR PROOF FOR PRINT.

ORIGINAL WORK / TRANSPARENT REFERENCES

How this identity was developed.

A strategy lead, copywriter, mark designer and artist role worked together as an AI creative team. The founder's brief and feedback set the direction. The mascot draws on a private dog photograph supplied by the founder; that photograph is not included.

Allan Peters's public process informed broad symbol studies, refinement and extending useful geometry into a wider identity. These were digital studies. Peters did not create, approve or endorse this identity; no institutional affiliation is implied.
